117. EXECUTION OF ROAD PROJECTS:- Reverting to the recommendations made earlier in the chapter for opening a few new roads and improving some of the existing roads and for the construction of Traffic circuses, we wish to point out that these recommendations are based on personal knowledge of local needs possessed by the members of the Roads sub-committee. They made spot inspections to satisfy themselves that the suggestions were PRIMA FACIE suitable . At the same time, they have felt and we agree with them, that detailed ~~xx~~ studies should be made and estimates prepared in respect of the several projects recommended and that where necessary, traffic surveys should also be conducted before anything in the nature of a concrete and workable programme can emerge. Even so, it may not be possible to carry out all the works decided upon, unless there execution is spread over a period of years.
